

Color Code Your Moving Boxes

- Create a Master List- write down each room in your new home and assign a color sticker.
- Pack boxes by room and mark with corresponding color sticker.
- Number each box and securely affix a label listing its' contents on the outside.
- Keep a copy of each numbered box's content list. Attach to your Master List so that when you need something you will know which box to find it in.
- Refer to Master List when transferring boxes to your new home. Post the assigned color sticker on a sheet of paper taped to the wall next to the doorway or inside of each room- movers can then place boxes labeled with that corresponding color sticker in the correct room.
